

20% of world's population in the age group of 0-4 years is in India

India has the **Highest mortality rate** for
the age group of 0-4 years in the world

Diarrhoea and Pneumonia are the biggest killer diseases in children aged under five years in India

Health-care providers asked **very few pertinent questions** that would enable correct diagnosis and understanding of the severity of the diseases

What If...

The Healthcare workers can ask the right questions? So we can save more 0-4 year olds in rural India

Team: Mahalo

What is *Abhilekh* and how does it help in asking the right question?

Prashnavalli

20 Questions for Deductive Reasoning
